COMPANY PROFILE

VECTORBOX systems offer a completely digital transmission workflow from ingest to playout including channel branding and file and redundancy management; all from one 4RU box.

System features include flexible file format and compression support including QuickTime, .avi and MXF, interactive music and SMS functionality, outstanding signal quality and best-in-class hardware platform.

In the news studio, V-BOX NEWS delivers content and graphics in standalone or with all major newsroom systems via MOS.

Since 1995, over 900 TV channels worldwide have chosen VECTORBOX systems for their advanced broadcast functionality, quality and stability as well as surprisingly affordable cost.
