COMPANY PROFILE

TI2000 designs and produces Intelligent Queue Management Systems for public attendance, to be installed in banking halls, government offices, hospitals, stations, etc. TI2000 applications are designed to work in any place where people wait for a ticket or another service. TI2000 has also developed a Visitors Control System, to be installed in government complexes, military areas, office buildings, and any other place where incoming visitors might be controlled.

PRODUCTS:

QSystem. An intelligent Queue Management System for customer service.

QAcces. An intelligent visitor control system.

OBJECTIVES FOR CeBIT 2008

Finding out new agents and distributors, in order to expand into foreign markets.
