COMPANY PROFILE

Connectia Solutions Factory is a Hardware and Software developer specialized in alarms, surveillance and control systems based on IP communications. Our products are designed for Nurse-Call, Video Security and Control systems used in applications for Hospitals, Geriatric Homes, Hotels, Smart Buildings, Parkings, Energy stations, Heliports and others that require remote site control and surveillance.

Connectia is a Spanish company that starts operations in 2003 developing solutions in Nurse Control and Control systems, with a new concept ... "Open systems and Total IP". Our development is focused completely on IP devices and our solutions are always following the guide to be the most open systems possible in order to facilitate the integration with different technologies from different manufacturers.

It is necessary to consider that our mayor efforts were placed in Hospitals and Geriatric homes but nowadays our technology and our new products can be placed in any infrastructures that require control, alarms and surveillance. This fact helps to place our products in different sectors and Interesting projects.

At the same time we manufacture products we also integrate other for different manufacturers to offer a complete product line to different economy sectors.

Nowadays in Spain Connectia brings solutions like:

- Nurse Call Systems IP
- Intercommunication IP
- Control Systems IP
- Alarm Systems IP
- Video Surveillance IP
- PA systems IP

For international market we are commercializing solutions with the most advanced technology and completely developed and manufactured from Connectia in Spain.

Our market in Spain has received Connectia as a revolutionary in Nurse Call Systems because this market was controlled by manufacturers focused in Hardware and electronic devices completely closed for different technologies. Connectia had shown new concepts in installation and integration to other systems and this fresh ideas had open widely the opportunities to have a place in this market dominated by manufacturers with old and traditional concept of Nurse Assistance Devices.
