COMPANY PROFILE

DeInta was born in 2001 as a project composed of a professionals team with wide experience in the field of audiovisual systems, electronic systems for security and communications.

In a world of constant technological evolution, we intend to be a clear reference in the search of solutions to the needs of our customers in our fields of activity.

As a result, our offer integrates different technological developments. In many cases our clients ask for solutions that require equipment or specific programs that are not available in the market. In that case, our company develops these solutions.

DeInta has invested in infrastructure and technical facilities to guarantee the quality and effectiveness of our services:

- LABORATORY OF ELECTRONIC DESIGN
- SOFTWARE LABORATORY
- TECHNICAL OFFICE
- TOOLS OF MEASUREMENT AND CERTIFICATION
