### **COMPANY PROFILE**

INTEGRASYS S.A. is a privately owned SME software development, engineering and integration company specialized in the telecommunication and broadcasting market. It was founded in 1990 by a group of Hewlett-Packard engineers developers of Automated RF & Microwaves Test Systems and Software.

#### **Products:**

- Satellite Monitoring
- Rf Monitoring
- Digital Television
- AutomatedTest

### **OBJECTIVES FOR IBC 2007**

To perform trial and evaluation of promising software technologies that are still uncertain and not exploited in the market of telecom systems and measurement systems, is the overall objective that provides the basis for the R&D action lines addressed by Integrasy in the next four years.
