COMPANY PROFILE

VSN is a trade mark of Just Edit, S.L. and one of the most cost-effective, end-to-end, digital and automation software platforms for TV currently available. It is a revolutionary way of doing television, replacing tapes and traditional proprietary video servers. VSN features new scalable technologies based on standard network and IT infrastructure, is compatible with the most popular NLE systems and enables easy migration to a fully digital and automated environment. VSN is an affordable software platform that quickly pays for itself, optimising current costs and increasing production. Around 300 TV channels around the world in over 35 countries are already using the robust and reliable VSN systems, with 30 using digital newsrooms. vsn systems are also installed in several media schools and universities to train the journalists of the future. VSN includes modules for digital newsroom, ingest, network editing, archive, graphics, web publishing, master control room playout, legal compliance and sms tv.

OBJECTIVES FOR IBC 2007

To continue developing its business to international level and of continuing creating its portfolio of clients.
