COMPANY PROFILE

OMB Sistemas Electrónicos, is an exclusively Spanish company, with exporting vocation specialized in the manufacturing of TV and Radio transmitters and antenna systems. Our products are designed and manufactured using the most advanced technology, with the principal aim of offering to our customers the best technical features and a suitable adaptation to the final requirements. So that, you can find OMB products in such technologically developed countries as the United States and you also can find our products in countries with a really poor technical ways and really had environmental conditions, like Ghana, in the African continent.

Products:

- EM 5000 is a 5000 W FM transmitter made up of the EM 100DIG exciter and a control unit which combines the power of two AM 2500 FM amplifiers.

OBJECTIVES FOR IBC 2007

To present the last new features and products consolidated in the international market to harness its potential clients.
