COMPANY PROFILE

Openbravo is a European software company that is growing across the globe. Openbravo is the developer of the leading professional web-based open source ERP and POS solutions designed specifically for small and medium businesses. In January 2006, Openbravo secured a €5 million (\$6.4m) financing agreement with Sodena, the business development agency for the Spanish region of Navarre. This record funding for an open source ERP company has fuelled invaluable software development while enabling the company to grow internationally. It is adamant that this can only be achieved by combining a great product, an open source philosophy and a valuable set of services to support the whole community.
