COMPANY PROFILE

PRODYS has been working since 1995 on Audio and Video Compression and Communications Technologies. PRODYS has been working since 1995 on Audio and Video Compression and Communications Technologies. PRODYS has two different kind of offerings: PRODYS provides video and audio technology solutions, that allows third parties to create their own applications and systems. These technologies include high performance video and audio compression software, hardware and reference designs or high-level integration services, to allow fast time to market products for its customers. PRODYS solutions are available for the Texas Instruments TMS320C6000™ and Motorola DSP56300™ that cover a wide range of applications in the fields of Audio, Video and Communications.

Products:

- Prontoc
- Portante
- Nereus
- Kronos E1/T1 Multiplexer
- Prodyscontrol
