### COMPANY PROFILE

Currently, our main business is the development and consolidation of the Rainbow brand both nationally and internationally. This brand focuses today on the manufacturing of computer peripherals and accessories, specifically Mouses, Keyboards, Wireless Kits, Webcams, gaming products, computer speakers, USB hubs and laptop cases.

Rainbow, an offshoot of a family business established in 1991, was created in 1997 as a result of identifying a clear business opportunity in the computer accessory market.

This is how Rainbow became an independent company, swiftly launching and developing a new brand of accessories and peripherals first for the Spanish market and later (2003) for the European market. Our products are manufactured in Asia and sold in Spain, Portugal, Belgium, Italy, Tunis, Austria, Switzerland and Germany.
