COMPANY PROFILE

TAFYESA, S.L. Is a company dedicated to the Automation and Remote management through PLC, software and communications networks located in Huesca.

It is now using the latest technologies in communications and continuous development to implement new models of Telemangement. There is a monitoring system and remote control facilities accessible to the user with a simple Internet connection, without the need for sophisticated management software in each computer.

Tafyesa Automation develops software customised for each particular solution in automation applications. These solutions can be integrated with other systems and devolve with the needs of each facility, that is, programming can be adapted to all kinds of changes in the elements of the installation.
